By land: Opposite Tour Fondue beach and facing the Espace Mer diving club

Site characteristics

Maximum depth **6 m**
Difficulty **Low**

Cultural and natural

Information about the managing body

The AREVPAM association studies and promotes Mediterranean heritage. It consists of archaeologists, diving professionals and photographers and participates in studies and underwater archaeological digs for the DRASSM (Department for underwater archaeological research) and Port-Cros National Park. In addition, a large part of its activities is dedicated to educational outreach. It manages two underwater trails: one devoted to the Almanarre archaeological remains at the Olbia site, while the other reconstitutes the Pointe du Bouvet archaeological site.

CULTURAL

Description of the site of cultural interest

The particularity of the Pointe du Bouvet underwater trail is that it presents a reconstitution of a Roman vessel that transported amphoras. This site has been developed by archaeologists and enables the public to discover a few of the basics of underwater archaeology.
